

Meeting Minutes

19:00 Tuesday, January 7, 1997
Energy Center 723

This was an abbreviated meeting due to the winter break

- The weather spotting network was discussed at length. Coordination between NWS, Cleveland County Emergency Management, and Norman Emergency Management, seems to be the only issue left. We also need people to volunteer to be on call to be the net controller.
 - Various and sundry discussions of sufficiently little importance that I can't remember any of them.
