*Old Business:*

- The last antenna at the antenna site near Wayne, OK still has not been removed. No word yet on getting a bucket truck to remove it. (David G.)
- If anyone in this club is a geology major, please contact Jud Ahern ([jahern@ou.edu](mailto:jahern@ou.edu)) ASAP to help with the acceptance of the KM5MJ donation earlier this year.

*Committee reports:*

- Website committee: Nothing to report.
- Skywarn/StormReady committee: No response from OU Daily on incorporating a severe weather graphic. It was noted that such a graphic may already be in the works for next year, independent of our prompting.
- Repeater committee: Reported that a new 440 MHz repeater is in operation at the NWC, run by Ken Brown, N5KUK. Frequency is 444.350 MHz (+, no PL).
- Publicity committee: For Howdy Week, Chris proposed that we set up dual stations, one on the South Oval (where the Howdy Week org fair will be taking place) and one inside the Union, in order to demonstrate communications capability between the two stations. Chris also proposed making brochures and a Powerpoint slideshow that can run continuously while the stations are set up.
